

## DICE EXPERIMENT

In this experiment you are going to roll two dice 60 times and work out the  $\underline{\text{sum}}$  of the two scores.

Copy the table below into your book and record the results in your table.

| Outcome | Tally | Frequency |
|---------|-------|-----------|
| 0       |       |           |
| 1       |       |           |
| 2       |       |           |
| 3       |       |           |
| 4       |       |           |
| 5       |       |           |
| 6       |       |           |
| 7       |       |           |
| 8       |       |           |
| 9       |       |           |
| 10      |       |           |
| 11      |       |           |
| 12      |       |           |
